

ABHISHEK GHATEKAR

Maharashtra, India • +91 8149257184 • ghatekarabhishek0@gmail.com • GitHub: github.com/newbie-del

PROFESSIONAL SUMMARY

Computer Engineering student with experience building AI-powered applications, full-stack web platforms, and data analytics solutions. Skilled in Python, SQL, JavaScript/TypeScript, React, Next.js, and PostgreSQL, with a strong foundation in designing scalable SaaS applications and integrating Large Language Models (LLMs). Enjoy solving real-world problems through software engineering, AI, and data-driven solutions while building end-to-end products from idea to deployment.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, TypeScript

Web Development: React.js, Next.js, Node.js, RESTful APIs, JWT Authentication, Google OAuth, GitHub OAuth

Databases: PostgreSQL, MySQL

Data Analytics: Advanced Microsoft Excel, Power BI, Tableau, Business Statistics

Artificial Intelligence & Machine Learning: Natural Language Processing (NLP), Deep Learning, Generative AI, Prompt Engineering, LLM API Integration (OpenAI, Google Gemini), MLOps

Cloud & Big Data: Microsoft Azure, Big Data Tools

Tools & Technologies: Git, GitHub, Linux, Visual Studio Code

PROJECTS

Blinkit Sales Analytics Dashboard | [GitHub](#)

July 2026

MySQL, Microsoft Excel, SQL, PivotTables, PivotCharts, Window Functions

- Analyzed 8,523 grocery sales records worth ₹2.6 Cr across 10 outlets, 16 product categories, and 1,392 products, identifying a 13.3% sales uplift linked to shelf visibility and a 10.9× revenue gap between outlet formats.
- Built an end-to-end analytics pipeline using MySQL and Excel, cleaning inconsistent records, validating data quality, and creating an executive dashboard with 10 PivotTables, 9 interactive charts, and 6 slicers for business decision-making.

FlowForge AI — AI Workflow Automation & Integration Platform | [GitHub](#)

Apr 2026

Next.js 15, React, TypeScript, PostgreSQL, Prisma, React Flow, Inngest, Better Auth, Polar, Sentry

- Built a drag-and-drop workflow automation platform with asynchronous execution, execution history, and real-time monitoring.
- Engineered 24+ workflow nodes supporting AI models, HTTP APIs, Google Workspace, Slack, Stripe, Discord, Telegram, browser automation, and code.
- Developed an AI workflow builder that converts natural-language prompts into validated executable workflows.
- Implemented secure authentication, encrypted credential storage, subscription management, and production monitoring using Better Auth, Polar, and Sentry.

Connex AI — AI-Powered Meeting Assistant Platform | [GitHub](#)

August 2025

Next.js 15, React, TypeScript, tRPC, Drizzle ORM, PostgreSQL, LiveKit, Gemini Live, Inngest, Better Auth, Polar

- Architected a SaaS AI meeting platform with custom AI agents, real-time participant management, and secure transcripts, recordings, summaries, and meeting chat.
- Engineered a low-latency voice assistant using LiveKit Agents and Gemini Live, enabling real-time conversations with speaker-attributed transcripts.
- Designed an event-driven workflow using Inngest to automate transcript processing, speaker identification, AI summaries, and post-meeting artifacts.
- Implemented OAuth authentication, subscription billing, usage limits, and premium access using Better Auth and Polar.

EDUCATION

BE in Computer Engineering — Universal College of Engineering, Mumbai University

Aug 2023 - Present

- CGPA: 6.00 / 10.00

Secondary & Higher Secondary Education

2018 – 2023

- SSC (Class X): 92%
- HSC (Science): 61%

CERTIFICATIONS

AWS – Mastering AI on AWS (Training toward AWS Certified AI Practitioner) • NASSCOM – Cyber Security • IIT Bombay – Cybersecurity Workshop • IIT Bombay – BSE Equity Research Workshop • Google – Assets, Threats, and Vulnerabilities

ACTIVITIES

- Attended Techfest, IIT Bombay, participating in technical workshops, technology showcases, and industry networking sessions.
